## **Communique**

Community Care Peterborough (CCP) and Kawartha Participation Projects (KPP) are committed to excellence in the provision of healthcare and support services to our community. Throughout the years, the goal of each organization has been to improve people's lives, ensuring they can live in their homes, with dignity, and participate in their communities by optimizing their health and well-being.

To continue to accomplish this goal, our organizations are now exploring ways to develop a more comprehensive range of coordinated and personalized services that will respond more effectively to the current and future needs of the people we serve.

The Central East LHIN is aware of, and supports our deliberations, recognizing that a new organizational model may result. As well, they support our commitment to look for ways to improve the delivery of top quality healthcare and support services.

As these deliberations get underway, there will be no disruption in the services and how they are currently provided to our clients.

We believe that, by taking a leadership role and working together, Community Care Peterborough and Kawartha Participation Projects, can enhance the services we provide in our community.

We look forward to sharing more information with our clients, our staff and our community as this exploratory work continues.

Together we will make a difference.

Joanne Watson, President  
Community Care Peterborough

Craig Adams, Board Chair  
Kawartha Participation Projects
